

George Burgess

UX Designer | Front-End Developer

PROFILE

My ambition is to one day become proficient at both Front-End Development as well as UX Design. With the combination of these two skill sets I will be able to design and build anything I want! But more realistically, I would be the perfect liaison between designers and developers.

I completed my master's degree in UX design in August of 2017. I would like to transition into a UX/UI designer role to better reinforce my studies and gain valuable real-world experience.

EDUCATION

Tennessee State University, Nashville, TN (ABET accredited)

Bachelor of Science in Computer Science

Graduation date: Fall 2014

G.P.A: 3.0

Activities and societies: Phi Beta Sigma Fraternity Inc.

Kent State University, Kent, OH

Master of Science in User Experience Design

Graduation date: Summer 2017

G.P.A: 3.8

Activities and societies: Alpha Kappa Mu Honor Society

EXPERIENCE

Accenture

2015- Present

• Associate Software Engineer

- In the Past I: Conducted research and development on open source tools to parse java log files from an existing application into a prototype log monitoring application. Helped design the process flow for the log monitoring application. Designed page layouts and navigation requested by the monitoring team.
- Currently I: Configure and maintain departments, business units, contractor timecards, and queries in PeopleSoft Financial. Create and maintain cost centers, projects, and companies in Workday FM.
